TYPICAL PROPERTIES

- Active quaternary ammonium chlorides: **3.34%**
- Specific Gravity: **1.00**
- pH : **9.0 - 10.0**
- Dilution: **2.5 oz per gallon**
- Appearance: **Clear yellow liquid**
- Odor: **Lemon**

SAFETY CAUTIONS

- Keep out of reach of children.
- Corrosive. Causes severe eye and skin damage.
- Refer to M.S.D.S. and product label for additional safety information and directions for use.

HMIS RATINGS

Lemon Fresh 20

Cleaner • Deodorizer • Disinfectant

Lemon Fresh 20 is a hospital grade, dual quaternary ammonium cleaner, deodorizer and disinfectant. It is designed for cleaning food handling equipment and utensils used at a rate of one ounce per gallon of water, followed by a potable water rinse. Effective in public places where cleanliness and bacterial control are vital.

As a liquid deodorizer, this products effectiveness is unsurpassed; its pungent lemon fragrance will tackle the most difficult deodorizing tasks. To disinfect hard surfaces prepare a solution of two and one-half ounces of concentrate per gallon of water. This solution is then applied with a mop, cloth, sponge or mechanical spray to wet all surfaces. Allow the solution to remain wet for ten minutes and then air dry. For heavily soiled areas, a pre-cleaning step is required and recommended.

See product label for additional information.
