DIRECTIONS:

USES: Floors, walls, metal surfaces, painted surfaces, exterior bowl surfaces, empty basins, garbage cans, showers, athletic equipment, conductive flooring, and lavatory fixtures in institutions, schools, and hospitals.

APPLICATION: Use 4 ounces of concentrate per gallon of water for a minimum contact time of 10 minutes. For disinfecting, remove filth and heavy soil deposits. Preclean all surfaces prior to disinfection, then thoroughly wet surfaces. This product is extremely versatile and can be applied with a mop, sponge, or cloth as well as soaking. Rinsing is not necessary on floor surfaces unless floors are to be waxed or polished. Fresh solution should be prepared at least daily or more often if the solution becomes diluted or soiled.

TO CLEAN AND DISINFECT TOILET BOWLS: Flush toilet. Add 3 fluid oz. directly to water in toilet bowl (3/4 gallon). Brush to cover all interior surfaces of the bowl including under the rim. Allow disinfectant solution to remain at least 10 minutes. Flush toilet. To clean badly stained bowl, repeat above treatment using 4 to 5 fluid ounces. For use in urinals, add 3 fluid oz. to 3/4 gallon of water. Apply by brush to all urinal surfaces. Allow disinfectant solution to remain at least 10 minutes. Flush.
