Clean, Deodorize and Remove Stains such as: Urine, Coffee, Juice, Blood, Mold and Mildew, Pet Messes, other Organic Stains, and More!

OXY-GEN-8 is a tough, color safe stain remover for clothes, carpets, tile and grout, concrete, trash containers, outdoor furniture, garbage disposals and more.

OXY-GEN-8 is the high energy stain remover that uses the power of oxygen to clean and deodorize. It cleans and whitens like bleach but is completely safe for colors and whites.

OXY-GEN-8 contains no toxic chemicals, cleaning solvents or harmful abrasives. When it is finished with its job, it breaks down into water, oxygen and soda ash. There are no toxic fumes.

DIRECTIONS

Dissolve OXY-GEN-8 using warm to hot water. Always test for color-fastness in an inconspicuous area before using.

General Stain Remover: 1/8 scoop OXY-GEN-8 per 16 ounces of water.

Laundry Booster: 1 scoop per load of laundry.

Carpet Spot Remover: 1/8 scoop OXY-GEN-8 per 16 ounces of water.

Tile & Grout: Mix 2 Scoops of OXY-GEN-8 with 2 tbsp. of water to create paste.

NOTE: DO NOT Use on wool, silk, leather or anything not water-washable. DO NOT MIX with chlorine bleach. Once mixed, solution should not be left in a sealed container. It will continue to give off oxygen and the container may expand or leak.

SOAK CLEANING (Laundry, Aquariums, Trash Containers, Fruit Juicers, Coffee Makers, Sleeping Bags, Tents, Athletic Jerseys):

Mix 1-2 scoops per gallon of hot water, add item and let soak for 1-6 hours. Remove item from solution and rinse or wash thoroughly.
