

AERO[®] Acid Cleaners are concentrated, aggressive and fast-acting

HIGHLIGHTS

- Concentrated
- Excellent brightener for trucks and buses
- Economical

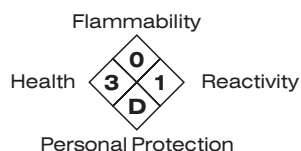

TYPICAL PROPERTIES

- Specific Gravity: **1.02**
- pH: < **1.0**
- Acidity: **5.0%**
- Appearance: **Clear, colorless liquid**
- Odor: **Acidic**

SAFETY CAUTIONS

- Keep out of reach of children.
- It is recommended that protective gloves be worn when using this product.
- Make sure there is adequate ventilation.
- Refer to M.S.D.S. for additional safety information.

HIMIS RATINGS

Briter 601 Cleaner & Brightener

**For Use On Non-ferrous Metal Surfaces
Such as Buses, Trucks, Trailer Bodies, Etc.**

Will not etch or harm good paint when used as directed, however this product is harmful to windshields and glass surfaces.

Briter 601 is a concentrated acid, solvent, detergent compound. Especially designed for those "problem" cleaning jobs that regular alkali cleaners, such as soaps, cannot do. Easy to apply. Follow simple directions and get results no other cleanser can give you.

IMPORTANT: Do not allow Briter 601 to dry on surface as rinsing is very difficult when dry.

DIRECTIONS-

1. Mix **Briter 601** with 30 to 40 parts water, depending on condition of surface to be cleaned.
2. Apply with spray nozzle pressure or fibre brush. Use liquid directly to surface area working always from bottom to top on vertical surfaces to prevent streaking.
3. ALLOW 3 MINUTES FOR COMPLETE ACTION.
4. Rinse with hose or brush, flushing thoroughly with clear water until all suds are gone and no chemical is left on surface. Be sure surface is rinsed well before chemical dries.
