

# aero<sup>®</sup> floating degreaser

## HIGHLIGHTS

- Highly concentrated
- Wide range of applications
- Excellent degreaser & spot remover
- Excellent for degreasing parts in cold tanks
- 100% Active, Non Acid
- Non Caustic, Non Corrosive

## TYPICAL PROPERTIES

- Specific Gravity: 0.84
- Terpene Hydrocarbons: 100%
- Solubility in water: Insoluble
- Appearance: Clear liquid
- Odor: Lemon-Lime

## SAFETY CAUTIONS

- **KEEP OUT OF REACH OF CHILDREN**
- **CAUTION: COMBUSTIBLE**  
Keep away from heat and flame.
- Keep container closed when not in use.
- Refer to M.S.D.S. and product label for additional safety information and directions for use.

## HMIS RATINGS

Derived from natural oils, this 100% active product has a wide range of applications, such as:

*Lift station floating degreaser  
Grease trap degreaser Stains and spot remover  
Emulsifies rubber tire marks  
Emulsifies tar, oil and asphalt  
Removes printer's ink  
Excellent industrial and engine degreaser  
Excellent Industrial degreaser  
Removes chewing gum from carpets and fabric  
Removes shoe polish, wax, crayon marks (fabrics/surfaces)*

## DIRECTIONS

**Cold degreasing:** May be used for immersion cleaning in non-agitated vats, circulation-type units, ultrasonic, air-agitated and pressure-spray units. Soak until clean. If desired, remove parts from vat and spray fresh product to flush away dissolved soils. Let product evaporate, or blow dry with air. **CIP cleaning:** May be used to clean motors and other equipment without disassembly. Apply by brush, cloth or spray. Do not use on operating equipment that may spark or that has an open flame. Do not spray on hot surface. Let product dry or forced-air dry before turning equipment back on. **For Odor Control:** Dilute 1 oz. concentrate into 1 gallon cleaning solution. For Grease Traps: Pour 5 oz. of concentrate daily into traps under 20 ft. capacity. Large traps use 8 oz. to 10 oz. Excellent deodorizing. **For Rug and Upholstery Spot Removal:** Apply concentrate with cloth to affected area and blot. For chewing gum blot concentrate on gum. Allow to stand for two minutes. Use a bone scraper to remove gum. Always test on an inconspicuous area of fabric before applying. **For Tar, Asphalt and Tire Mark Removal:** Apply concentrate directly. Allow to stand 2 to 4 minutes. Agitate if necessary. Rinse with clear water. **For Lift Station Degreasing:** May be used as a preventative maintenance measure. To do this drip product in the influent at the rate of 1/4 to 1-1/2 ppm. (45 drops per minute equals one gallon in 24 hours). A simple water gate valve will maintain drip once set, as low as one pint per day. Drip directly into wet wells and lift stations. Add directly to sewer lines and force mains to remove grease build-up. Eliminates grease or scum cakes in digester. Introduce through top digester in any port or inspection holes; 20 to 25 gallons is a good average guideline to follow. After introducing add 500 to 2000 gallons of water, continue to wet down top of grease cake daily. After treating digester, add 1 to 2 gallons daily in sludge compartments. In doing this you are working on the grease cake from top to bottom. After adding through sludge compartment continue circulation as usual.

Innovative. Expansive. Flexible.
