

aero[®] herbicides

AERO[®] line of Herbicides consists of a full range of non-selective weed killers, including oil and water-based products, liquids and granular, non-residuals and soil sterilants.

HIGHLIGHTS

- Non-selective
- Soil sterilant
- Water or oil-dilutable

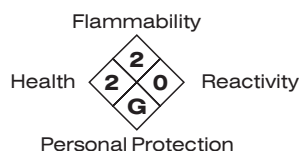

TYPICAL PROPERTIES

- Specific Gravity: **0.870**
- Prometon: **3.75% min.**
- Petroleum Distillates: **91.15%**
- Appearance: **Clear yellow liquid**
- Odor: **Solvent**

SAFETY CAUTIONS

- Keep out of reach of children.
- Causes substantial but temporary eye injury. Do not get in eyes. Harmful if swallowed, inhaled or absorbed through skin. Avoid contact with eyes, skin or clothing. Avoid breathing vapor or spray mist. Wear safety glasses. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.
- Refer to M.S.D.S. and product label for additional safety information and directions for use.

HMIS RATINGS

Super Weed Killer Concentrate

For total weed control on certain areas around the business or workplace where no plant growth is desired, use as specified in label directions. Controls bindweed, common mullein, and other hard-to-kill weeds. Prevents plant growth for up to one year. This weed killer concentrate is a nonselective product intended for use after dilution with water, or an appropriate oil, or other approved carrier. For best results, apply to bare ground or when weed growth is just starting. Weeds taller than 4-6 inches should be hoed before treatment or it may be necessary to make a second application. A second application may be necessary to control deep-rooted perennial weeds. Use for bare ground vegetation control in driveways, brick walks, paths, patios, parking areas, play areas, along fences and curbs, around buildings, and under graveled pathways where plant growth has come through these surfaces.

DIRECTIONS- For control of annual and susceptible perennial weeds such as downy brome grass, oatgrass, goosegrass, quackgrass, punctervine, goldenrod, and plaintain. To cover 100 sq. ft., add 10 - 16 fl. oz. by use of a sprinkling can or other watering or spraying device in sufficient water to get good coverage of the area (e.g., 2 1/2 gals. in sprinkling can). For control of hard-to-kill perennial broadleaf and grass weeds such as bindweed and johnsongrass as well as the biennials common mullein and wild carrot, use 1 1/3 to 1.8 qts. in sufficient water to get good coverage. Different grades of mineral oil, diesel fuel, petroleum-based-oil, fuel oil, or kerosene may be substituted for water.

PRECAUTIONS - (1) Apply when air is calm to avoid the possibility of drift onto desirable plants or grass. (2) Keep away from the roots of desirable plants and trees. (3) Use only in areas where complete control of vegetation is desired. (4) This weed killer concentrate should not be used on cultivated areas, on ground that is to be cultivated, in greenhouses, or near the drip line of trees or shrubs. (5) Do not use on slopes or in areas where runoff is likely to occur (apply only to level surfaces). (6) Avoid using where adjacent desirable trees, shrubs, or plants may be injured from leaching of the chemical through the soil. (7) Keep children and animals off treated areas until these areas are dry.
