

aero herbicides

Our AERO® line of Herbicides consists of a full range of non-selective weed killers, including oil and water-based products, liquids and granular, non-residuals and soil sterilants.

HIGHLIGHTS

- Selective herbicide
- Translocates to roots
- Water dilutable
- Kills dicots without harming most monocots

TYPICAL PROPERTIES

- Dilution: **Water dilutable**
- Odor: **Pungent**
- pH: **9.0 - 10.0**
- Appearance: **Dark amber liquid**
- Odor: **Pungent**

SAFETY CAUTIONS

- Keep out of reach of children.
- May be fatal if swallowed, absorbed through skin or inhaled. Causes skin irritation. Do not breathe spray mist. Do not get in eyes or on clothing.
- Refer to M.S.D.S. and product label for additional safety information and directions for use.

HMIS RATINGS

Disappear A Selective Broadleaf Weed Herbicide

Disappear is a water dilutable, selective broadleaf herbicide designed to give complete kill of undesirable weeds without harming sensitive grasses such as St. Augustine, bentgrass and buffalo grass. It can be used on all Merion grasses, Kentucky Bluegrasses, Rye, Fescues, Bermudas, and Zoysia grasses. This product contains a synergistic hormone blend of chemicals which are absorbed into the leaf and translocated to all other parts of the plant including the stems and roots producing a thorough and lasting kill.

DIRECTIONS- Mix with water and apply through any type of sprayer used for applying liquid. It is applied directly on to the foliage of weeds and grasses. Usually only one application is necessary for complete control unless weed growth is heavy, then a second application may be necessary 2 or 3 months later.

See product label for additional directions.
