

aero® solvent degreasers

AERO® Solvent Degreasers are designed to meet a wide variety of heavy-duty industrial cleaning requirements and environmental concerns.

HIGHLIGHTS

- Fast drying
- No flash point
- For vapor degreasers and cold immersion tanks

TYPICAL PROPERTIES

- Specific Gravity: **1.45**
- Dielectric Breakdown Voltage: **30,000 volts**
- Flash Point: **No Flash Point**
- Evaporation Rate: **6.4**
- Residue on Drying: **None**
- KB Value: **130**
- Appearance: **Clear liquid**
- Odor: **Chlorinated solvent**
- USDA: **K-2**

SAFETY CAUTIONS

- Keep out of reach of children.
- It is recommended that protective gloves and safety glasses be worn when using this product.
- Make sure there is adequate ventilation.
- Refer to M.S.D.S. for additional safety information.

HMIS RATINGS

Solv 400

Vapor Degreaser & Cold Cleaning Solvent

Solv 400 contains trichloroethylene which is not identified as an ozone depletor. Its high solvency, vapor density, low boiling point and non-flammability make it ideal for vapor degreasing as well as cold degreasing. Safe on ferrous and non-ferrous metals, but may be harmful to some plastics. **Solv 400** may be substituted for 1,1,1 trichloroethane in applications below.

DIRECTIONS:

● **Vapor degreasing:** May be used in straight vapor-type machines, immersion-vapor machines, spray-vapor machines and ultrasonic units. Do not allow contamination of solvent to exceed 25%. Maximum recommended sump temperature is 193 deg. F. Outlet cooling water temperature should be 110 to 120 deg. F. Thermostat shut-off temperature should be set at 205 deg. F. Operate water separator below 100 deg. F. Keep heating and condensing coils clean, inspect pump packing, valve stems, piping and gaskets frequently for leaks. Avoid drafts around equipment to minimize evaporation losses. Keep cover on unit during idle and shut-down periods.

● **Cold degreasing:** May be used for immersion cleaning in non-agitated vats, circulation-type units, ultrasonic, air-agitated and pressure-spray units. Soak until clean. If desired, remove parts from vat and spray fresh product to flush away dissolved soils. Let product evaporate, or blow dry with air.
