

# aero® disinfectant cleaners

All AERO® disinfectant cleaners are federally registered with the EPA

## HIGHLIGHTS

- 2.0% quaternary ammonium chloride formulations
- 5 oz/gal dilution
- Neutral pH - excellent for routine floor maintenance
- Economical
- Excellent deodorizers

## TYPICAL PROPERTIES

- Specific Gravity: **0.995**
- pH: **7.5**
- Solids: **3.2%**
- Phosphates (as  $P_2O_5$ ): **0%**
- Active Quats: **2.0% min.**
- Appearance:  
LA382 - **Clear green liquid**  
LA391 - **Clear yellow liquid**  
LA460 - **Clear blue liquid**
- Fragrance:  
LA382 - **Mint**  
LA391 - **Lemon**  
LA460 - **Fresh**
- USDA: **C-1**

## SAFETY CAUTIONS

- Keep out of reach of children.
- Refer to M.S.D.S. and product label for additional safety information and directions for use..

## HMIS RATINGS

## Neutral Cleaner Disinfectants

### Mint 7, Lemon 7, Fresh 7

**Mint 7 (LA382), Lemon 7 (LA391), Fresh 7 (LA460)**

When applied as directed to precleaned hard, non-porous surfaces, these disinfectants kill a wide variety of gram-positive and gram-negative bacteria such as *Salmonella choleraesuis*, *Staphylococcus aureus*, *Candida albicans*, *Escherichia coli*, *Streptococcus pyogenes*, *Enterobacter aerogenes*, *Shigella sonnei*.

## DIRECTIONS-

**FOR GENERAL DISINFECTION** of hard, non-porous inanimate surfaces (glass, metal, plastic, glazed porcelain, linoleum, tile, leather, vinyl, enamel and finished wood surfaces) on walls, floors, appliances and furnishings in industrial and commercial offices, restrooms and work areas. Make a solution of 5 oz. of product per one gallon of water.

**CLEANING AND DEODORIZING:** Whenever practical, flush away gross soils with water. Cleaning may be accomplished with a clean mop, sponge, squeegee, wet vacuum system, or a coarse spraying device. After cleaning remove suspended soils with a clear water rinse, vacuum pick up or by wiping with a clean mop, sponge, squeegee or cloth.

**DISINFECTING:** Before disinfecting, preclean surfaces as directed above. Thoroughly wet the surfaces to be disinfected with disinfecting solution. The disinfecting solution must contact the surface for 10 minutes for proper disinfection. If desired, the surfaces may then be rinsed with clear water or wiped with a clean damp cloth.
