

aero[®] floating degreaser

HIGHLIGHTS

- 100% Natural Hydrocarbons
- Highly concentrated
- Lift Station Degreaser
- Excellent for degreasing parts in cold tanks

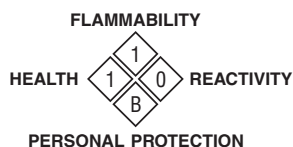

TYPICAL PROPERTIES

- Specific Gravity: 0.89
- Solubility in water: Insoluble
- Appearance: Golden brown liquid
- Odor: Edamame

SAFETY CAUTIONS

- **KEEP OUT OF REACH OF CHILDREN**
- **CAUTION:** May be harmful if swallowed. May irritate eyes and skin.
- Keep container closed when not in use.
- Refer to M.S.D.S. and product label for additional safety information and directions for use.

HMIS RATINGS

Highly Concentrated

100% NATURAL, 100% ACTIVE, NON-CORROSIVE, NON-ACID, and NON-CAUSTIC!

DIRECTIONS

Cold degreasing: May be used for immersion cleaning in non-agitated vats, circulation-type units, ultrasonic, air-agitated and pressure-spray units. Soak until clean. If desired, remove parts from vat and spray fresh product to flush away dissolved soils. **For Lift Station Degreasing:** May be used as a preventative maintenance measure. To do this drip product in the influent at the rate of 1/4 to 1-1/2 ppm. (45 drops per minute equals one gallon in 24 hours) A simple water gate valve will maintain drip once set, as low as one pint per day. Drip directly into wet wells and lift stations. Add directly to sewer lines and force mains to remove grease build-up. Eliminates grease or scum cakes in digester. Introduce through top digester in any port or inspection holes; 20 to 25 gallons is a good average guideline to follow. After introducing add 500 to 2000 gallons of water, continue to wet down top of grease cake daily. After treating digester, add 1 to 2 gallons daily in sludge compartments. In doing this you are working on the grease cake from top to bottom. After adding through sludge compartment continue circulation as usual.
